

DeKALB COMMUNITY MURAL TEMPLATE

Dimensions: 10' high by ~60' wide (box roughly proportional to the mural space). Metal pole and black cable are not to be painted. Metal door can be painted if primed with appropriate Nova Color metal primer. You may draw or use computer software to depict your design. If you use a computer, please be aware that you are responsible for recreating your design on the wall. This template is meant to help the committee understand your design concept; the committee will also rely on your artwork submissions to envision this design concept.
